

Fibre Wads 16ga.

New Range of Evo II & Cork Filler Wads.

FES modular biodegradable wads; using either a single Evo II wad plus if required the addition of a cork filler to the required total wad length.

Thus giving you the home loader the largest choice of fibre wads available anywhere.

Cork can also help reduce the effects of the set back forces when the cartridge is fired resulting in less deformed pellets and hence better down range pattern.

FES investing in reloading, with our own CNC machine.

16ga Fibre Wads & Over Powder Cards

Type	Length	Per 100	Per 500	Per 1000
Evo II Driving Wad	12mm	£3.00	£16.00	£31.00
